Heatmap of select BP GOterms
Term
ossification
negative regulation of Wnt signaling pathway
response to unfolded protein
osteoblast differentiation
p38MAPK cascade
NIK/NF−kappaB signaling
response to glucocorticoid
SRP−dependent cotranslational protein targeting to membrane
negative regulation of cell death
response to stress
regulated exocytosis
negative regulation of G2/M transition of mitotic cell cycle
actin cytoskeleton organization
mitotic cell cycle
stem cell population maintenance
mRNA splicing, via spliceosome
